# CNCS–CEREBRO
Nurse Call Management Software

Overview

The Calix CNCS-CEREBRO is the core of Calix NCS range, Cerebro works as the central controller, interface, scheduler, communication switcher, supervisor, logger and report server. The CEREBRO is a modular, scalable, interoperable solution designed to streamline the entire communication, management and alerting requirements in the modern healthcare environment. The Cerebro ensures communication between the patient and caregiver at all times by getting the critical information to the right staff at the right time. The system is a high-end fully scalable PC-based management tool to visualise all system events within a station or the entire premises. The software assists in providing full control over the standard system operations and performs a wide range of functions such as call logs, alarms, messages, shift changes, faults and much more. The main interface displays the bed list, and the editing interface displays the patient's information.

Features

▸ Versatile Reporting Software

▸ Contextual Notification
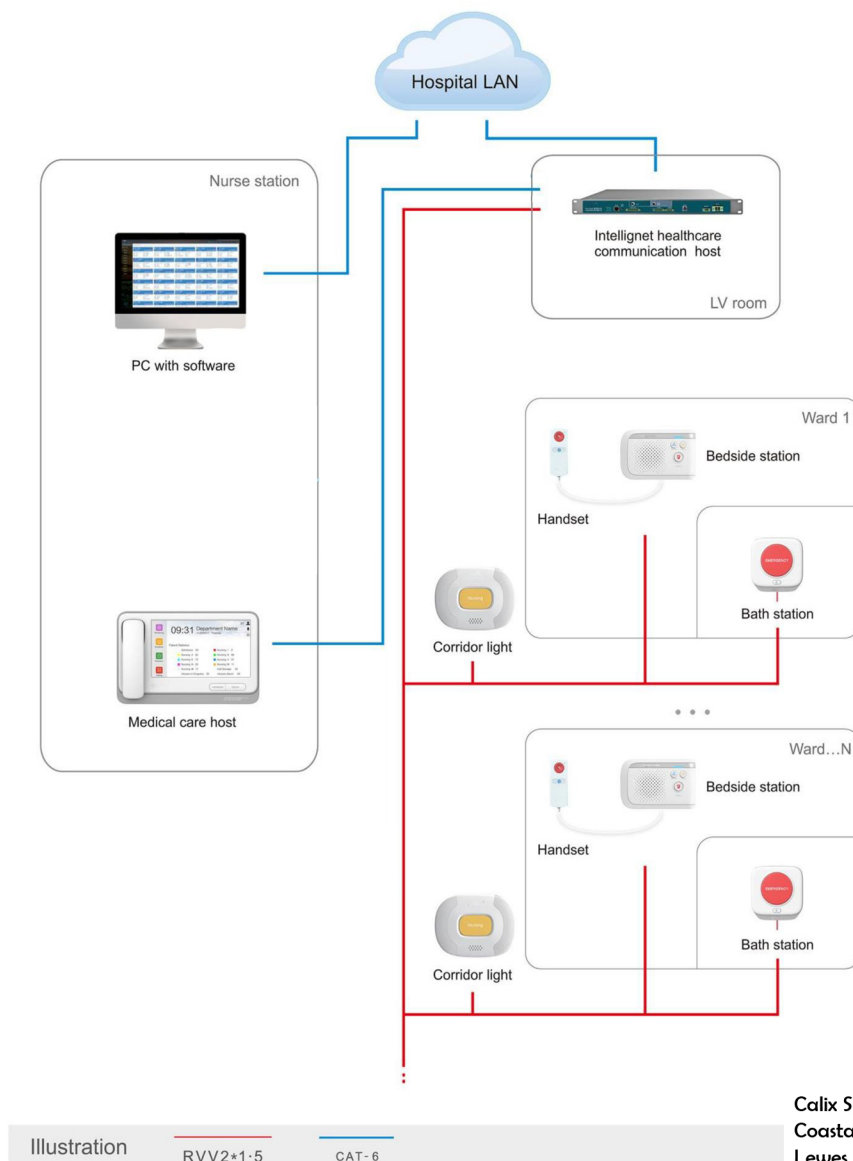

▸ Customized Workflow

▸ Dashboard Monitoring
